Key Stage Three

We operate a two year Key Stage 3, delivering a broad and balanced curriculum. Students acquire skills and knowledge required to support progression on to Key Stage 4.

We offer taster sessions for subjects not usually considered as Key Stage 3 subjects in order that students can make an informed choice about which optional subjects they elect to study at GCSE level. Additionally, careers advice is delivered, thus ensuring options choices best support students' progression into their chosen post 16 destination.

Students taught include: English, Maths, Science, RE, PE, History, Geography, French, German, Drama, Design and Technology.
